VEHICLE SIGNAL SPECIFICATION ONTOLOGY (VSSo)
Initial VSSo Development

Based on VSS v1.0 Benjamin Klotz created within his PhD the first version of VSSo backed by Eurecom and BMW. Creation and mapping mostly manual, extensions partially automatic. Results of his work influenced the development towards VSS v2.0.

Next Steps

- Define use cases for the ontology (ongoing)
- Define core ontology (proposal, discussion started)
- Create tooling for conversion from VSS v2.x based on core ontology
- Work towards W3C Recommendation
**Initial VSSo Development**

Based on VSS v1.0 Benjamin Klitz created within his PhD the first version of VSSo backed by Eurecom and BMW. Creation and mapping mostly manual, extensions partially automatic. Results of his work influenced the development towards VSS v2.0.
