

TT/minutes/20150622

PREAMBLE[edit]

- it seems a bit difficult to keep continuity on two-weekly calls. therefore we shall try weekly shorter calls for a while. The calls will take place every Monday, 3PM CET - initial target will be 30 minute duration for main business, but some discussion may run longer if there is interest.

PREVIOUS MINUTES[[edit](#)]

- public wiki choice still with PMO
- bring forward: Work out how to get the VM distributed - Action SL take this to the BIT and report back
- strike this: (brought forward) Action PS write to IPC list about genivi-projects - there has been good discussion, cross-posting to genivi-projects as appropriate. no need for the PS action.
- (brought forward) SL, JF, Collabora are looking at an automated testing prototype possibly around Lava - could we take this to the upstream communities? This is now a topic itself for Tools Team, see below.
- encoding of enumerations was discussed at SAT F2F.

Action GA continue with Marco

Action GA check docs.projects.genivi.org scripting with PMO

SURVEY DISCUSSION[[edit](#)]

- we had 50 respondents to the survey, which hopefully give some confidence that this work is of real interest to the community
- PS raised that approximately 60% of respondents want to see emphasis on automated test and continuous integration. We discussed this and agreed that we should get involved (<https://trello.com/c/x2Fhxhfs>) initially discussing with JF and Collabora on the existing work.
- further discussion of the survey results can happen at future meetings

ONGOING TASKS (<https://trello.com/b/SwTkXMCa/genivi-tools>)[[edit](#)]

- action KB to check Gunnar's review of Eclipse Automotive vs Eclipse DSL (<https://trello.com/c/qZ7GI5qN>)
- action SL post his GDP patches to the list (<https://trello.com/c/XsJ1DLqK>)

FALL AMM[[edit](#)]

- possible demo of new common api - add discussion on this to agenda for meeting in 2 weeks time
- PS to check attendees - [RFC] email sent to genivi-projects list
