GENIVI: Gunnar, Philippe R

wiki: <https://at.projects.genivi.org/wiki/display/WIK4/GENIVI-OCF+Demonstrator>  
Jira: <https://at.projects.genivi.org/jira/projects/GOCF>  
code repo: <http://git.projects.genivi.org/?p=meta-genivi-ocf-demo.git;a=summary>

## Review of action items

GOCF-15 - Define UI for shopping list and other smart home scenarii:  
3 buttons will be provided - leading home, smart home status, etc., Anson will put details in the wiki

GOCF-12 - Define vehicle side RVI services for OCF Demo: Anson will add some details

GOCF-9 - RVI Local Node in OCF-RVI Gateway: Anson can close it

GOCF-6 - Port HVAC UI from AGL to GDP: JLR got a GDP running, might take another week or so for completion, we use GDP 9 and build for VTC-1010 (x86)

GOCF-3 - Verify Location simulator in GDP : Anson - we will load gps data from a file

GOCF-13 - Define infra to integrate devices and gateway: Anson - wifi: we use hardwired connection between the vehicle and the cloud, will add a comment on wifi

remote integration trough the internet: Sanjeev and Anson have planned to start it to-morrow

Adjourned: 7:20am CET
