

# TT/minutes/20170621

## Invitees

- [Gunnar Andersson](#) (GENIVI Development lead)
- [Jeremiah Foster](#) (Luxoft / GENIVI CM)
- [Klaus Birken](#) (Itemis)
- Torsten Mosis (Elektrobit)
- [Nicholas Contino](#) (GENIVI IT)
- [Gianpaolo Macario](#) (Mentor Graphics – Siemens)
- [Manfred Bathelt](#) (BMW)
- [Philippe Robin](#) (Technoveo)
- Jorg-Olaf Henning (Continental)
- Aaron Eiche (JLR)
- [Stephen Lawrence](#) (Renesas)
- Nasima Thomassen (Mobica)
- [Remigiusz Kotaj](#) (Mobica)
- [Bartosz Taczaa](#) (Mobica)

## Attendees

- [Nicholas Contino](#) (GENIVI IT)
- [Jeremiah Foster](#) (Luxoft / GENIVI CM)
- [Remigiusz Kotaj](#) (Mobica)
- [Gunnar Andersson](#) (GENIVI Development lead)
- [Stephen Lawrence](#) (Renesas)

## Apologies

- [Klaus Birken](#)

## Planned agenda

- Update on Component specification work
  - Where are we with the component spec?
  - Do we need to schedule more meetings in the coming months? (I'm happy to coordinate.)
  - Do we have something ready for publishing and discussion?
- Mobica update on CANDevStudio if interested and available
- Solys update if Torsten is interested and available
- AoB

## Minutes

- Remik gave some updates on CANDevStudio, planned more updates
  - There are plans to add CANDevStudio into the GDP SDE
  - Newer versions of Qt and GCC are required
  - Discussion on toolchains, Ubuntu and Yocto versions
  - Gunnar: if we need to make an update to Ubuntu 16.04 we can, its doable
  - Remik: Another way is to just install later version of GCC into Ubuntu
  - Gunnar: Is the compiler issue a blocker?
  - Remik: I don't think the compiler issue is so urgent
  - Remik: Do you think we should integrate the latest proof-of-concept with more features or the latest stable master only?
  - Gunnar: You'll have to guide us Remik, if it works and its okay we can include it. As soon as you have something we can include it into the CI server
  - Remik: Is there still a chance to use AppVeyor (for Windows builds)
  - TODO: Jeremiah to re-try AppVeyor integration to check if the organization can exclude private repos
  - Stephen: Keep up the work
- Update on Component specification work
  - Need to blow some wind into the sails again, would be nice to coordinate new meetings after the vacation time
    - *This is still valid!*
  - Franca+ repository available [franca\\_plus repository](#)
    - Extension of the Franca grammar with validation as a PoC, no additional tooling available yet
    - Early proof of concept
    - Franca-plus GitHub, discuss with Manfred (done)
  - We should have a regular time slot for these meetings so that we can make progress before vacation (done)
  - Manfred working on mechanism to partition component on certain devices
  - Manfred currently driving the open source process internally, hopeful that it will be quick
- Once it is open source everyone can test and provide feedback on a hands-on basis
- Internal discussions at Renesas on Franca to web based
- Manfred stated that the changes that are planned are in the architecture description so the current IDL work should not disrupt the Franca web definitions
- Gunnar has discussed the Franca web interface definition in several places

- Franca to WebIDL should be possible, but apparently it is not widely used. We need to generate bindings on both the server side and the web side. There's a need to use JSON for example

## Action Items

- ☑ Jeremiah Foster to re-try AppVeyor integration to check if the organization can exclude private repos 23 Jun 2017
- ☑ Jeremiah Foster Add an account on GitHub for Bernard Hennlich 22 Jun 2017
