TT/minutes/20160224

Tools Team meeting

- Wed 24th February 2016Tools team
- Call through webex
- Participants: Jeremiah (thanks for creating the intro doc for the discussion), Gunnar, Gianpaolo, Stephen and Agustin

Agenda

- Git Strategy, technical discussion (30 min)
  - Link: https://at.projects.genivi.org/wiki/display/TOOL/2016/02/19/Managing+git+workflow
- Other goals, follow up (10 min)
- 14th AMM Tools team session design

Minutes

This call was to discuss so we present here the agreements and relevant points of view, not the individual opinions.

1.- Git strategy

- Discussion about how to face the request from PMO, due March 8th.
- Although participants have a wide experience with most of the tools presented by the intro work from Jeremiah, TT would like to discuss the requirements before presenting any recommendation related with tools.
  - The fact that different companies uses some of these tools proves that most options could be valid for GENIVI from the features point of view, at least.
  - Agreement on the need to ensure smooth integration with our current tools: private/public Confluence/JIRA and go.cd specially.
- Agreement on the fact that the self hosted vs third party provided infrastructure/service has some strategic implications out of our scope as Tools Team.
  - This decision should be strongly linked to the level of investment GENIVI decide to put in this area, in our opinion.
- General agreement around guidance/best practices/recommendations vs rules in terms of development/review processes.
- There is a general consensus around the benefits of using Gerrit for GENIVI.

Next steps

- Next meeting will be a call again so we close the recommendations for PMO.
- TT will present them to the project mailing list.
- TT will recap the feedback and provide PMO the final document.

2.- Goals follow up

- Epics has been created
  - ACTION item for those who has tasks assigned: please link your task to one of the created Epics or write Agustin suggesting an extra epic for them.

3.- 14th AMM TT session

- PMO requires an abstract of the session.
  - ACTION: agustin will create it based on our 4 goals.
